Trusted System	6
Updated the Page is use inline Editing (3.20.5.1)	6

UPDATED SCHEDULED JOBS GRID (3.20.2.2)

Updated the Scheduled Jobs grid to display the Scheduled Start Time and the Actual Start Time. These two times will not always be the same; if the scheduler is busy it will queue the job and start it after other jobs have finished.

REPORTS & DOCUMENTS

UPDATED CODE WHEN SAVING A NEW REPORT (3.20.1.1)

When a new report is being added to the system, the code has been updated to handle errors in a more consistent way.

ADDED MORE WEB VIEWER OPTIONS (3.20.2.1)

The Web Viewer tab has been updated with 3 new options. The first two override the Refresh and Search button toolbar global options. This allows the administrator to either enable or disable the Refresh and Search toolbar buttons.

The third option can turn off the option that allows users to select a different viewer for the report. Setting the option to Disable Viewers will turn off the dropdown box of additional viewer and force the user to use the Web Viewer.

Document Name: Sales by Employee

ADDED NEW EXCEL VIEWER (3.20.7.1)

Added a new inline Excel viewer. You can now view the Excel file directly within Ripplestone.

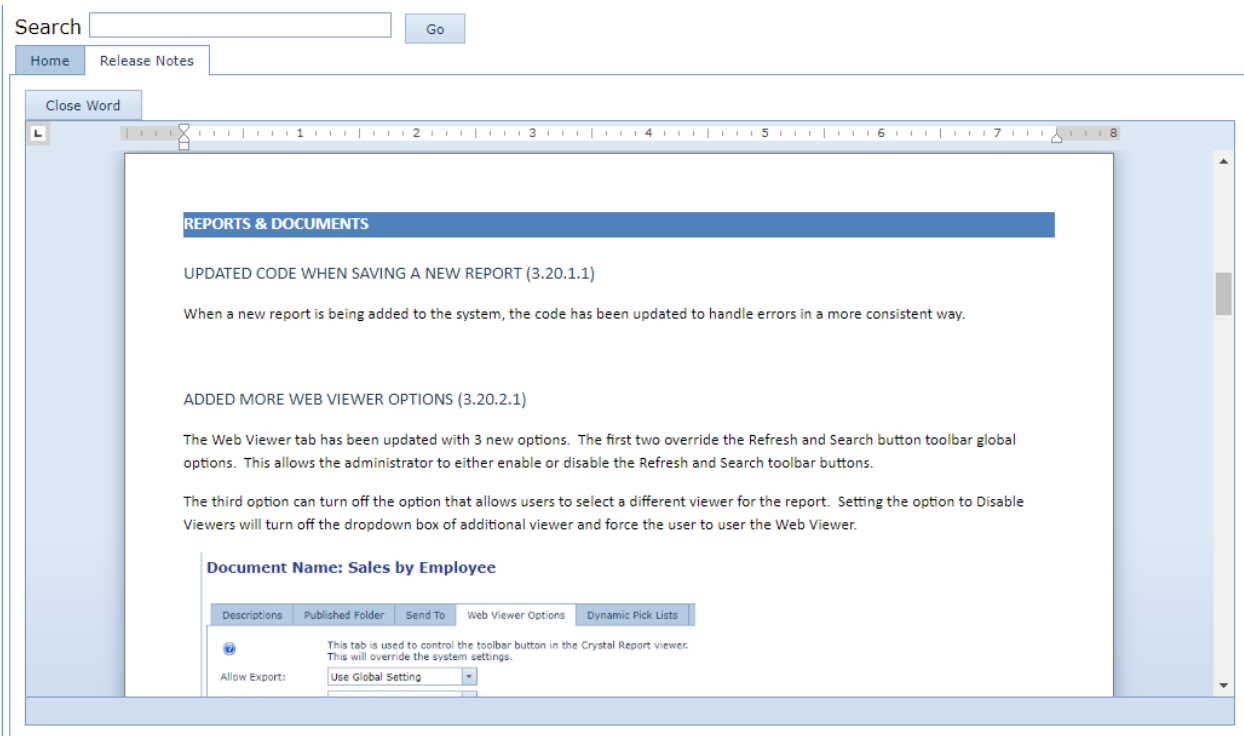

The screenshot shows an inline Excel viewer interface. At the top, there is a search bar and a 'Go' button. Below that, a 'Home' tab is selected, and the ribbon includes 'Close Excel', 'File', 'Home', 'Insert', 'Page Layout', 'Formulas', 'Data', 'Review', and 'View'. The ribbon is divided into sections: Clipboard, Font, Alignment, Number, Cells, Editing, and Styles. The main area displays a spreadsheet with the following data:

Customer ID	Customer Name	Contact First Name	Contact Last Name	Contact Title	Contact Position	Last Year's Sales	Address1	Address2	City	Region	Country	Postal Code
4	Psycho-Cycle	Alexander	Mast	Mr.	Sales Representative	52,809.11	8287 Scott Road		Huntsville	AL	USA	358

69	Furia	Lino	Rodriguez	Mr.	Sales Manager	201,000.00	Jardim das rosas n. 32		Lisbon	Lisbon	Portugal	190
70	Folk och fä	Marie	Larsson	Mrs.	Owner	201,000.00	Åkergatan 24		Bräcke	Jaemtland	Sweden	S-8

ADDED NEW WORD VIEWER (3.20.7.1)

Added a new inline Word viewer. You can now view the Word file directly within Ripplestone.

The screenshot shows an inline Word viewer interface. At the top, there is a search bar and a 'Go' button. Below that, a 'Home' tab is selected, and the ribbon includes 'Close Word'. The main area displays a document with the following content:

REPORTS & DOCUMENTS

UPDATED CODE WHEN SAVING A NEW REPORT (3.20.1.1)

When a new report is being added to the system, the code has been updated to handle errors in a more consistent way.

ADDED MORE WEB VIEWER OPTIONS (3.20.2.1)

The Web Viewer tab has been updated with 3 new options. The first two override the Refresh and Search button toolbar global options. This allows the administrator to either enable or disable the Refresh and Search toolbar buttons.

The third option can turn off the option that allows users to select a different viewer for the report. Setting the option to Disable Viewers will turn off the dropdown box of additional viewer and force the user to use the Web Viewer.

Document Name: Sales by Employee

Descriptions | Published Folder | Send To | Web Viewer Options | Dynamic Pick Lists

This tab is used to control the toolbar button in the Crystal Report viewer. This will override the system settings.

Allow Export:

ADDED PDF EXPORT OPTIONS (3.20.7.1)

Using the Custom Export Options, the user now has options for PDF files.

Custom Export Options

Use the options below to customize the export file

File Type:

PDF Export Options

Page range

All

Page range

From: To:

Create bookmarks from group tree

File Name:

ADDED FILE NAME TEXT BOX TO THE CUSTOM EXPORT OPTIONS FORM (3.20.7.1)

The Export Options page now has a place to name the export file. Before you got a generic name that was saved to the Downloads folder. See screen shot above to view the File Name textbox.

DYNAMIC PARAMETERS

CHANGED THE TEST DYNAMIC PARAMETER BUTTON (3.20.6.1)

Changed the code when testing a Dynamic Parameter to allow the database code to work with SQL Server with TLS 1.2 turned on.

SCHEDULER

CHANGED THE LIST OF SCHEDULED JOBS TO NOT DISPLAY DUPLICATES (3.20.1.1)

When a user belonged to many scheduling roles, they would see duplicates in the list of scheduled jobs if more than 1 roles had the same scheduled job assigned. The new code will only display scheduled jobs once in the list.

UPDATED THE CONTROLS FOR THE SCHEDULED INTERVAL (3.20.7.1)

Updated the formatting with new controls for the Schedule Interval

The screenshot shows the 'Schedule' tab of the Scheduler interface. The 'Schedule Interval' is set to 'Hourly'. Below it, there is a dropdown for 'Select the Hourly Interval' set to 'Each hour'. A checkbox labeled 'Select the hours to run (optional)' is checked. The 'Start Time' is set to '7 AM' and the 'End Time' is set to '6 PM'. Other fields include 'Begin on Date' (2/10/2012), 'Start Time' (5:00 PM), and 'End on Date'.

The screenshot shows the 'Schedule' tab of the Scheduler interface. The 'Schedule Interval' is set to 'Monthly'. Below it, there are radio buttons for 'Day' and 'The', with 'The' selected. The 'The' dropdown is set to 'First' and the 'Day' dropdown is set to 'Day'. Other fields include 'Begin on Date' (2/10/2012), 'Start Time' (5:00 PM), and 'End on Date'.

FIXED BUG WHEN SAVING A MONTHLY SCHEDULED GROUP (3.20.7.1)

When saving a Scheduled Group that was to run monthly, you had to select all the options, or you would get an error. The code has been changed to only require the minimum options to make the group work.

ROLES

REMOVING FOLDERS FROM A ROLE (3.20.1.1)

Fixed a bug when removing a folder from a role. When the folder was removed from the role, the data cache was not getting cleared so the folder would look like it was not removed. This would appear this way until the cache was cleared or it expired. The updated code clears the cache when a folder is removed from a role.

UPDATED THE PAGE IS USE INLINE EDITING (3.20.5.1)

Updated the page to use more updated grids and allow the editing to be completed directly on the grid. This includes adding the Trusted Systems and the users.
